

Certifire Notice number 46

Date: 26th July 2023

To: Certifire members

Subject: **TS10 – Double-leaf Assemblies**

Dear Certifire Members

The purpose of this CERTIFIRE notice is to advise the requirements relating to double-leaf assemblies.

Double-leaf assemblies shall incorporate a primary and secondary leaf of identical construction only, unless the certificate holder has completed sampled fire resistance testing of varying door leaf constructions within a paired configuration.

Therefore Double-leaf assemblies will incorporate a primary and secondary leaf of identical construction, unless the specific CERTIFIRE certificate of approval for the door assembly states otherwise.

TS10 shall be updated to reflect this CERTIFIRE Notice accordingly.

All certificates will be amended at the next possible update.

If you have any queries regarding Notice No. 46, please do not hesitate to contact us.

Yours sincerely,

Paul Duggan
Certification Manager
